Re: Heavy Metal statement for all Waiū Products

Heavy metals contamination in New Zealand dairy products is strictly prohibited and monitored by the Ministry for Primary Industries (MPI) under the National Chemical contaminants Programme (NCCP).

Samples are collected from dairy farms and processing plants and analysed (annually) for a wide range of metal elements.

NCCP results demonstrate that milk products from the New Zealand Dairy Industry, including Waiū Dairy Limited Partnership comply with MPI regulations

Sincerely,

A handwritten signature in black ink, appearing to read "Robert Jordan".
